DETAILED ACTION

1. The Applicants' preliminary amendment filed January 3, 2006 is acknowledged. Claims 3-18, 20-38, 40-41, 43-45, 47-50 and 52-53 are amended. Now, Claims 1-53 are pending.
2. The following restriction requirement is based on Claim 51 depending on Claim 38, **pending verification**.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-37, drawn to a method of producing an IPN, classified in class 525, subclass 474.
 - II. Claims 38-40 and 49-51, drawn to a method of producing a polymeric unit, classified in class 427, subclass 532+.
 - III. Claims 41-44 and 52-53, drawn to a method of producing a polymer membrane, classified in class 525, subclass 100+.
 - IV. Claims 45-48, drawn to an IPN, classified in class 525, subclass 479.

The inventions are distinct, each from the other because of the following reasons:

4. Inventions of Group I and Groups II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, Group I is directed to a method of producing an IPN, while Group II is directed to a method of producing a polymeric unit, and Group III is directed to a method of producing a polymer membrane.

5. Inventions of Group I and Group IV are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product of Group IV can be prepared by a process where the monomer is not precipitated.

6. Inventions of Group II, Group III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects

(MPEP § 806.04, MPEP § 808.01). In the instant case, Group II is directed to a method of producing a polymeric unit, Group III is directed to a method of producing a polymer membrane and Group IV is directed to an IPN that can be prepared by a process where the monomer is not precipitated.

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kuo-Liang Peng whose telephone number is (571) 272-1091. The examiner can normally be reached on Monday-Friday from 8:30 AM to 5:00 PM.
